

#8 Previously, Michael the Canary trainer had kidnapped Munch the hungry gerbil. The lovable indestructible grad student of Chaos and Commander HJ went to a physics lab in Kentucky to save him, but were attacked by a hoard of lady bugs commanded by Michael--

I'll give you all the candy bugs you can eat if you help me to defeat the Lovable indestructible grad student of Chaos

It's Commander HJ! Tell you what commander we'll let you have a soda if you can make Michael realize how much he needs us. Now that he has his lady bugs, he doesn't pay attention to us anymore---

Oh, why won't someone hurry up and feed me? I'd do anything for some food...

Meanwhile, Commander HJ is successful at locating the soda machine---

Elsewhere...

There's too many lady bugs! I better summon Clucky!

In more haste, the lovable inebriated grad student of chaos draws a picture of Clucky.

There! And now...

- Poof -

What's going on?

Why call me?

I'm being vanquished by lady bugs

It's more fun to be vanquished with someone

Hey, this Munch!

We've got to get out of here! I told Michael that I would betray you in exchange for all his candy bars, but I just ate the candy bars & ran away! Now, he's really mad! Oh, I also ate all the lady bugs's food, too!

Hey! There's no food left!

I'm not working for no pay!

Let's go fly into windshields and try to cause car accidents!

Yeah!

I found the soda machine! It was right next to the particle accelerator.

particle accelerator? I have an idea

Several days later in the particle acceleration room...

I'll put this can in the particle accelerator and because matter increases in size when it's accelerated, in a few seconds

We'll have a really huge can of soda! Help me shake it! I have an idea!

Soda

A short time later...

When I find that no good lying gremlin I'll...
Hey! What's that...

There's a note on it. "Source of Grad student power, Do Not Drink!"

PROS

KABOOM!

I guess he didn't listen to my note, let's get out of here before Michael digs himself out of the rubble

How do you know he survived?

I am a personal friend of the great artist who draws these comics

It's starting to rain. What happened to my umbrella?

Oh, oh, I left it in the physics lab. Hey, can I done on the way home?

And so, our heroes enjoy a relaxing car trip home...

I'm hungry again! Can we stop to eat

I can't read the speedometer! Can someone tell me how fast I am going?

Are you still going to finish your thesis today?

How fast can the car go in reverse?
